# OUR STORY OF WOODEN HOT TUBS AND SAUNAS

Maudis team is happy to have you here. We are a family business that is already known as a high quality wholesaler of saunas and hot tubs in Lithuania.

Maudis started the business in 2011, and during more than 10 years of hard work we already have clients in Norway, Sweden, Finland, Lithuania, Latvia, Czech, Netherlands, Germany, Romania, France, United Kingdom, Austria, and other countries.

The business idea has grown from a strong need to offer valuable products that can be personalized for each desire. We all have different tastes but, as well, we all value a good time when we can relax and enjoy every moment of it alone or in the beloved company. So, our team found a solution to offer different packages with possible additional accessories to order the best hot tubs that suits clients' desires...

With constant improvement and the finest materials for production, we set a high standard for each, and every item sold. Maudis is proud of a philosophy that accepts no compromises on quality. As a wholesaler of saunas and hot tubs, we are very clear that our core value is to make our clients fully satisfied with a final result.

The production process requires a lot of handwork, so we pay special attention to every detail during the manufacturing of hot tubs and saunas. Diligence and meticulousness allow us to create products that serve customers for a long time and give the best emotions.

We are open to any cooperation in the wholesale of saunas and hot tubs trade. Please, contact us for a detailed offer on any sauna, cabin, or hot tub for sale.

Vilhelmas Daugmaudis  
CEO Maudis

# BARREL

For many years, barrel saunas have been the most popular and traditional outdoor saunas. Our barrel saunas are distinguished by their light design - sleek finish and attention to details makes the harmonious and modern external look.

Saunas are designed and built with knowledge and care. Barrel saunas can be delivered fully assembled and ready to use, needing very little maintenance. Barrel saunas can also be sold as a DIY KIT to build the sauna at remote areas.

The storage of the sauna does not require a heavy foundation. A foundation has to be even and load-bearing (the floor or ground has to be level and able to support the weight of the sauna). We recommend putting it on the terrace, paving stone chips, or at least a few bricks under corners for a permanent installation.

Materials and technical description:

- Walls and roof of the sauna are made from 42mm white wood.
- Wall elements are tightened with long screws which ensure strength, longevity and stability of the construction.
- The roof is covered with bitumen shingles and a special underlay. It prevents water and snow from penetrating inside, withstand high winds, reduces the risk of damages during unloading the sauna.
- The floor in the sauna room is made from untreated 27 mm terrace boards with small air gaps for perfect ventilation and water drainage.

- All wood used for floor frame and construction is impregnated.
- Harvia Light sauna lamps, special heat, water-resistant cables, and IP65 waterproof switches are used for electricity and lights. Quality and safety are our top priority.
- The entrance door is made of 6 mm tempered and tinted glass.
- Benches and backrests are made of aspen/black alder or thermowood to protect against sap.
- Exterior of the sauna is painted thoroughly with quality and long lasting paint. The colours are optional.
- Electric or wood fired heating is available. Wood fired heater comes with the full installation. Heater is placed on a special floor protective pad (designed and manufactured exclusively for Maudis) to increase the security from fire. The walls near the unit are protected by a Cembrit board. The chimney outlet is insulated with special heat-resistant wool.

Barrel saunas can be converted to camping/ guest cabins, etc. We can offer beds, different sizes and types of windows, interior and exterior light, sockets and other accessories that give completeness to the products we offer.

Our team here welcomes you to share your own ideas - we will assist you in creating an exclusive product for your market.

# CUBE

Cube Sauna is the latest addition to Maudis' saunas collection. We are proud that this sauna became one of the best selling models in just several months. Aesthetic and modern design, spacious and comfortable interior are the distinctive features of a Cube sauna.

Saunas are designed and built with knowledge and care. Sauna Cube can be delivered fully assembled and ready to use, needing very little maintenance. Cubes can also be sold as a DIY KIT to build the sauna at remote areas.

The storage of the sauna does not require a heavy foundation. A foundation has to be even and load-bearing (the floor or ground has to be level and able to support the weight of the sauna). We recommend putting it on the terrace, paving stone chips, or at least a few bricks under corners for a permanent installation.

Materials and technical description:

- Walls and roof of the sauna are made from 42 mm white wood.
- Wall elements are tightened with long screws which ensure strength, longevity and stability of the construction.
- The roof is covered with bitumen shingles and a special underlay. It prevents water and snow from penetrating inside, withstand high winds, reduces the risk of damages during unloading the sauna.
- The floor in the sauna room is made from untreated 27 mm terrace boards with small air

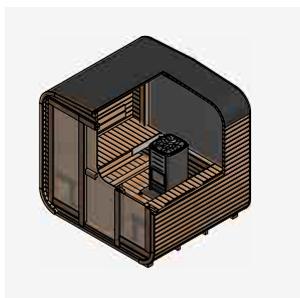

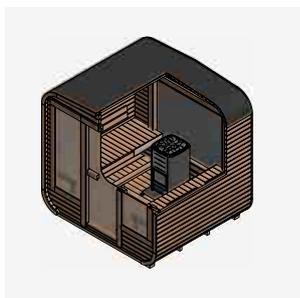

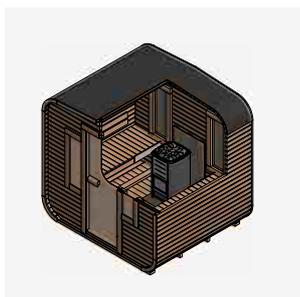

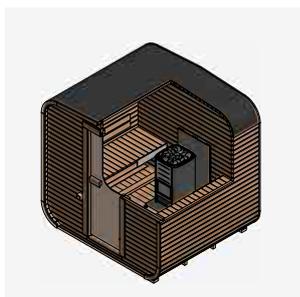

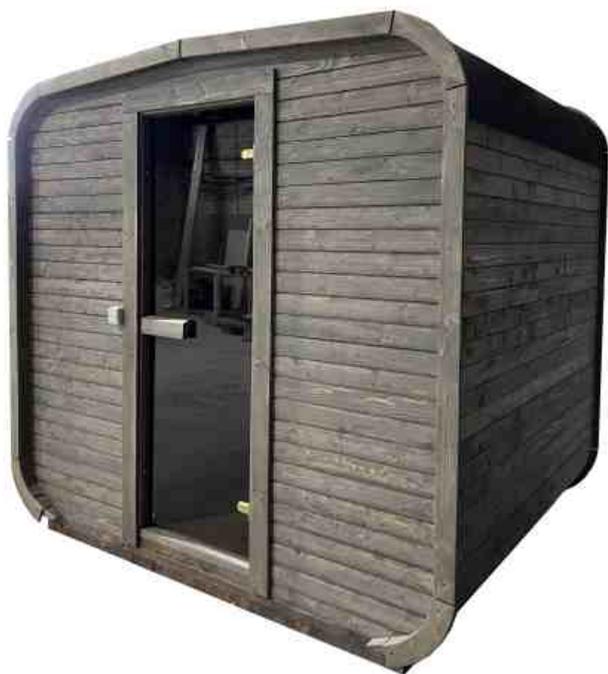

gaps for perfect ventilation and water drainage.

- All wood used for floor frame and construction is impregnated.
- Harvia Light sauna lamps, special heat, water-resistant cables, and IP65 waterproof switches are used for electricity and lights. Quality and safety are our top priority.
- The entrance door is made of 6 mm tempered and tinted glass.
- Benches and backrests are made of aspen/black alder or thermowood to protect against sap.
- Exterior of the sauna is painted thoroughly with quality and long lasting paint. The colours are optional.
- Electric or wood fired heating is available. Wood fired heater comes with the full installation. Heater is placed on a special floor protective pad (designed and manufactured exclusively for Maudis) to increase the security from fire. The walls near the unit are protected by a Cembrit board. The chimney outlet is insulated with special heat-resistant wool.

Cube saunas can be converted to camping cabins, home office, etc. We can offer beds, different sizes and types of windows, interior and exterior light, sockets and other accessories that give completeness to the products we offer.

Our team here welcomes you to share your own ideas - we will assist you in creating an exclusive product for your market.

# CUBE COMBI

A photograph of a modern, rectangular sauna cabin with a yellow exterior and black trim. The cabin is situated in a snowy, wooded area. A chimney pipe extends from the roof, with a small amount of smoke visible. The word "BOX" is overlaid in large, white, sans-serif font on the left side of the image.

# BOX

BOX sauna was first introduced as a classic Scandinavian design cabin, but later it appeared to be easily converted to minimalist-modern style design sauna. The BOX sauna has a lot of variations, therefore, it is usually suitable for customers willing to have a unique sauna to fulfill a seamless exterior design in their garden.

BOX sauna is already known as Maudis signature model, also being the first of Maudis series. We are proud of the solid sauna construction giving a possibility to use the sauna for many years. Box saunas have more space inside giving a possibility to convert a changing room to a cosy area for your rest.

BOX cabins are delivered fully assembled and ready to use. For remote areas we can offer a service to build a sauna on sight.

The storage of the sauna does not require a heavy foundation. A foundation has to be even and load-bearing (the floor or ground has to be level and able to support the weight of the sauna). We recommend putting it on the terrace, paving stone chips, or at least a few bricks under corners for a permanent installation.

Materials and technical description:

- Walls and roof of the sauna are made from 42mm white wood.
- Wall elements are tightened with long screws which ensure strength, longevity and stability of the construction.
- The roof is covered with bitumen shingles or coated steel fin. It prevents water and snow from penetrating inside, withstand high winds, reduces

the risk of damages during unloading the sauna.

- The floor in the sauna room is made from untreated 27 mm terrace boards with small air gaps for perfect ventilation and water drainage.
- All wood used for floor frame and construction is impregnated.
- Harvia Light sauna lamps, special heat, water-resistant cables, and IP65 waterproof switches are used for electricity and lights. Quality and safety are our top priority.
- The entrance door is made of 6 mm tempered and tinted glass.
- Benches and backrests are made of aspen/black alder or thermowood to protect against sap.
- Exterior of the sauna is painted thoroughly with quality and long lasting paint. The colours are optional.
- Electric or wood fired heating is available. Wood fired heater comes with the full installation. Heater is placed on a special floor protective pad (designed and manufactured exclusively for Maudis) to increase the security from fire. The walls near the unit are protected by a Cembrit board. The chimney outlet is insulated with special heat-resistant wool.

BOX saunas can be converted to camping/guest cabins, garden offices, storage cabins etc. We offer beds, different sizes and types of windows, interior and exterior light, sockets and other accessories that give completeness to the products we offer.

Our team here welcomes you to share your own ideas - we will assist you in creating an exclusive product for your market.

# WHY UAB MAUDIS IS DIFFERENT?

## COMMUNICATION

We are proud of our professional sales and customer support team. Your phone calls and emails will be answered immediately and with great knowledge about the product.

## RELIABLE SUPPLY

We keep a lot of material in stock to avoid shortages and delayed deliveries. We have fast manufacturing and delivery terms even in peak season.

## DELIVERY

Hot tubs and saunas are quite a special product to deliver. We offer proper packing and best delivery rates.

## QUALITY

As we offer repairs all over Europe, every issue means a trip to fix it. We want to avoid that, so quality is a top priority. We investigate every issue, learn from mistakes and constantly improve. Our products are made with great focus on quality and simple but reliable design.

## WARRANTY

We provide a 24 month warranty with repair service in your country, at your customer's place. If you work with us, you can be sure all warranty issues are solved without wasting your time and resources. We limit your risk, so you can sell with lower margins and more competitive prices.

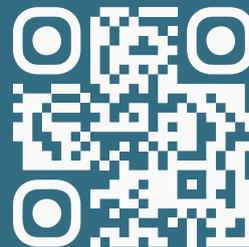

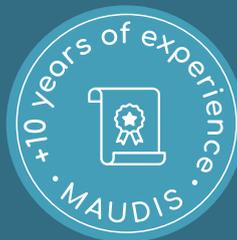

## COMPETITIVE PRICES

All of the above is meaningless if prices don't beat competitors. Making thousands of hot tubs and saunas we can use a scale to our advantage. We can offer the best prices in the market without compromising on quality.

## GET IN TOUCH!

Our experts are here to help you. Ask us anything.
